

Ball Aerospace Exhibits Weather Readiness at American Meteorological Society Annual Meeting

BOULDER, Colo., Jan. 11, 2016 – Ball Aerospace & Technologies Corp. kicks off 2016 celebrating 60 years in the aerospace industry at the 96th annual American Meteorological Society (AMS) annual meeting.

The 96th meeting of the AMS will draw more than 3,000 scientists, researchers, educators, students, and other professionals from across the weather, water and climate community, January 10-14, at the Ernest N. Morial Convention Center, New Orleans, Louisiana.

Ball began as the Ball Brothers Research Corporation in 1956. For the past six decades, Ball Aerospace has served as a technology innovator for defense and civilian government agencies and commercial customers.

During the AMS conference, Ball Aerospace will highlight its weather-ready instruments currently in production, including the Ozone Mapping and Profiler Suite (OMPS), one of five instruments aboard the Joint Polar Satellite System (JPSS), our nation's next polar-orbiting weather satellite set to launch in 2017. Ball also built the trailblazer for JPSS, the Suomi National Polar-orbiting Partnership and its OMPS instrument which began Earth observations in 2011.

Ball is also building NASA's Tropospheric Emissions: Monitoring of Pollution (TEMPO) instrument to make revolutionary new air pollution measurements over North America, from Mexico City to Canada and from coast to coast; and a similar instrument called the Geostationary Environment Monitoring Spectrometer (GEMS) under a commercial contract with the Korea Aerospace Research Institute (KARI) for the National Institute of Environmental Research in the Ministry of Environment of South Korea.

Sunday, January 10: Ball will participate in the very popular AMS Weather Fest, featuring free demonstrations and interactive experiments for weather enthusiasts of all ages.

Wednesday, January 13: Ball lidar research scientist, Sara Tucker, will be one of several presenters during the session, "Advances in Satellite Observations and Earth Science and Observing Technologies." Tucker will detail Ball's work on the Green-OWAL (GrOAWL) Airborne Demonstrator for the ATHENA-OAWL mission concept.

To learn more about Ball Aerospace during the AMS meeting, please visit us at booth #207. If you are interested in interviewing Ball program experts during the show, contact Media Relations Manager Roz Brown at 720-581-3135.

Ball Aerospace & Technologies Corp. supports critical missions for national agencies such as the Department of Defense, NASA, NOAA and other U.S. government and commercial entities. The company develops and manufactures spacecraft, advanced instruments and sensors, components, data exploitation systems and RF solutions for strategic, tactical and scientific applications. Ball continues to invest and innovate in affordable, high resolution imaging systems, contributing to the needs of civil, military and commercial customers. For more information, visit <http://www.ballaerospace.com/>.

Ball Corporation (NYSE: BLL) supplies innovative, sustainable packaging solutions for beverage, food and household products customers, as well as aerospace and other technologies and services primarily for the U.S. government. Ball Corporation and its subsidiaries employ 14,500 people worldwide and reported 2014 sales of \$8.6 billion. For more information, visit www.ball.com, or connect with us on Facebook or Twitter.

Forward-Looking Statements

This release contains "forward-looking" statements concerning future events and financial performance. Words such as "expects," "anticipates," "estimates" and similar expressions identify forward-looking statements. Such statements are subject to risks and uncertainties, which could cause actual results to differ materially from those expressed or implied. The company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Key risks and uncertainties are summarized in filings with the Securities and Exchange Commission, including Exhibit 99 in our Form 10-K, which are available on our website and at www.sec.gov. Factors that might affect: a) our packaging segments include product demand fluctuations; availability/cost of raw materials; competitive packaging, pricing and substitution; changes in climate and weather; crop yields; competitive activity; failure to achieve productivity improvements or cost reductions; mandatory deposit or other restrictive packaging laws; customer and supplier consolidation, power and supply chain influence; changes in major customer or supplier contracts or loss of a major customer or supplier; political instability and sanctions; and changes in foreign exchange or tax rates; b) our aerospace segment include funding, authorization, availability and returns of government and commercial contracts; and delays, extensions and technical uncertainties affecting segment contracts; c) the company as a whole include those listed plus: changes in senior management; regulatory action or issues including tax, environmental, health and workplace safety, including U.S. FDA and other actions or public concerns affecting products filled in our containers, or chemicals or substances used in raw materials or in the manufacturing process; technological developments and innovations; litigation; strikes; labor cost changes; rates of return on assets of the company's defined benefit retirement plans; pension changes; uncertainties surrounding the U.S. government budget, sequestration and debt limit; reduced cash flow; ability to achieve cost-out initiatives; interest rates affecting our debt; and successful or unsuccessful acquisitions and divestitures, including, with respect to the proposed Rexam PLC acquisition, the effect of the announcement of the acquisition on our business relationships, operating results and business generally; the occurrence of any event or other circumstances that could give rise to the termination of our definitive agreement with Rexam PLC in respect of the acquisition; the outcome of any legal proceedings that may be instituted against us related to the definitive agreement with Rexam PLC; and the failure to satisfy conditions to completion of the acquisition of Rexam PLC, including the receipt of all regulatory approvals.
