

Ball Aerospace's Laura Coyle On-Deck for Optical Society Ambassador

BOULDER, Colo., Dec. 13, 2017 /PRNewswire/ -- Dr. Laura Coyle, an optical engineer at Ball Aerospace, has been selected to serve as one of The Optical Society's (OSA) 2018 Ambassadors. As an ambassador, Coyle will join an international team of 10 other emerging leaders in optics and photonics from both academia and industry to provide career advice, technical knowledge and mentorship to young professionals. They will serve as traveling lecturers for student chapters and local sections, supporting professional development events at local OSA meetings and engaging with their local communities.

"We are thrilled Laura will serve as an OSA Ambassador, as she will be a great role model for students and young professionals," said Debra Facktor, vice president and general manager, strategic operations and commercial aerospace business, Ball Aerospace. "Ball is proud to support our employees as they engage in various technical and science communities of interest to their careers and our customers."

Coyle joined Ball as an optical engineer in 2014 after completing her Ph.D. in Optical Sciences at the University of Arizona. She works on several flight programs for Civil Space, such as the alignment and performance characterization of the [Operational Land Imager-2 \(OLI-2\)](#) instrument for the Landsat-9 mission, as well as the optical test and on-orbit commissioning team for [NASA's James Webb Space Telescope](#). Coyle is involved in business development and internal research and development activities, primarily aimed at technology development for future NASA flagship missions and accurate, flexible optical metrology systems.

"As an active member of the SPIE and OSA student chapters in graduate school, I gained invaluable insight into what it meant to pursue a career in optics, as well as guidance on how to build that career," said Coyle. "The OSA Ambassador program is a way to continue the cycle of mentorship and share what I have learned in my career at Ball thus far, as well as continue my own development by strengthening connections with OSA."

Coyle joined OSA in 2009 while she was a doctoral student at The University of Arizona where she served on the student chapter's Executive Committee, the International Network of OSA Students North America Conference (IONS-NA2) planning committee, and was a participant of OSA Congressional Visit Days. She will begin her role as an OSA Ambassador in January 2018.

Ball Aerospace pioneers discoveries that enable our customers to perform beyond expectation and protect what matters most. We create innovative space solutions, enable more accurate weather forecasts, drive insightful observations of our planet, deliver actionable data and intelligence, and ensure those who defend our freedom go forward bravely and return home safely. Go Beyond with Ball.® For more information, visit www.ball.com/aerospace or connect with us on [Facebook](#) or [Twitter](#).

Ball Corporation (NYSE: BLL) supplies innovative, sustainable packaging solutions for beverage, food and household products customers, as well as aerospace and other technologies and services primarily for the U.S. government. Ball Corporation and its subsidiaries employ 18,450 people worldwide and 2016 net sales were \$9.1 billion. Forward-Looking Statements

This release contains "forward-looking" statements concerning future events and financial performance. Words such as "expects," "anticipates," "estimates," "believes," "targets," "likely" and similar expressions typically identify forward-looking statements, which are generally any statements other than statements of historical fact. Such statements are based on current expectations or views of the future and are subject to risks and uncertainties, which could cause actual results or events to differ materially from those expressed or implied. You should therefore not place undue reliance upon any forward-looking statements and any of such statements should be read in conjunction with, and, qualified in their entirety by, the cautionary statements referenced below. The company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Key factors, risks and uncertainties that could cause actual outcomes and results to be different are summarized in filings with the Securities and Exchange Commission, including Exhibit 99 in our Form 10-K, which are available on our website and at www.sec.gov. Additional factors that might affect: a) our packaging segments include product demand fluctuations; availability/cost of raw materials; competitive packaging, pricing and substitution; changes in climate and weather; competitive activity; failure to achieve synergies, productivity improvements or cost reductions; mandatory deposit or other restrictive packaging laws; customer and supplier consolidation, power

and supply chain influence; changes in major customer or supplier contracts or a loss of a major customer or supplier; political instability and sanctions; currency controls; and changes in foreign exchange or tax rates; b) our aerospace segment include funding, authorization, availability and returns of government and commercial contracts; and delays, extensions and technical uncertainties affecting segment contracts; c) the company as a whole include those listed plus: changes in senior management; regulatory action or issues including tax, environmental, health and workplace safety, including U.S. FDA and other actions or public concerns affecting products filled in our containers, or chemicals or substances used in raw materials or in the manufacturing process; technological developments and innovations; litigation; strikes; labor cost changes; rates of return on assets of the company's defined benefit retirement plans; pension changes; uncertainties surrounding geopolitical events and governmental policies both in the U.S. and in other countries, including the U.S. government elections, budget, sequestration and debt limit; reduced cash flow; ability to achieve cost-out initiatives and synergies; interest rates affecting our debt; and successful or unsuccessful acquisitions and divestitures, including with respect to the Rexam PLC acquisition and its integration, or the associated divestiture; the effect of the acquisition or the divestiture on our business relationships, operating results and business generally.
