

Waste Management Phoenix Open to Feature Ball Corporation's Infinitely Recyclable Aluminum Cups

The sustainable aluminum cups pilot will replace compostable plastic cups at the "Greenest Show on Grass" in the popular Patriots Outpost venue

BROOMFIELD, Colo. and SCOTTSDALE, Ariz., Jan. 29, 2020 /PRNewswire/ -- [Ball Corporation](#) (NYSE: BLL) and [Waste Management](#) (NYSE: WM) today announced a collaboration to bring Ball's infinitely recyclable aluminum cups to the PGA TOUR's 2020 [Waste Management Phoenix Open](#) at TPC Scottsdale. The event, which convenes more than 700,000 fans over the course of seven days, has long focused on championing sustainability. Inclusion of Ball's aluminum cup is a part of Waste Management's commitment to educating fans on how to "Recycle Right."

Ball, a leader in cutting-edge, sustainable aluminum beverage packaging, designed the lightweight aluminum cups in response to growing consumer preference for more sustainable products. Waste Management, the title sponsor of the Phoenix Open, is adopting the aluminum cups to help forward its mission of creating the largest zero waste sporting event in the world for the eighth consecutive year.

"The Waste Management Phoenix Open is a shining example of how events big and small can make sustainability a core part of their mission," said John A. Hayes, Ball's chairman, president and chief executive officer. "We're proud to join together with Waste Management to bring fans the aluminum cup and help meet their zero-waste goal, while also expanding the cups to golf fans."

During the tournament, 7,000 of the 20-ounce cups will be used in the Patriots Outpost, a tournament venue on the 18th fairway that is exclusively for **Active, Reserve, Veterans and Retired U.S. Military** to enjoy complimentary food and beverages while watching PGA TOUR golf in a relaxed and comfortable setting. Waste Management is also hosting the #BinThereDoneThat social media contest, in which fans are encouraged to submit their recycling trick shots via social media for a chance to win a 2021 Waste Management Phoenix Open ticket package.

"We're excited to team up with Ball to bring the game-changing aluminum cup to fans at this year's Waste Management Phoenix Open," said Brent Bell, vice president of recycling, Waste Management. "Waste Management is a leader in promoting sustainability and environmental solutions, and the introduction of the infinitely recyclable aluminum cup will play an important part in helping us educate fans about how to recycle right here at the tournament and when they return to their homes, communities and businesses."

Infinitely recyclable and economically valuable, aluminum is the most sustainable beverage packaging material, and like aluminum cans, aluminum cups can be easily recycled. In fact, 75 percent of the aluminum ever produced is still in use today. In addition to its sustainability and recycling strengths, the aluminum cup is lightweight, sturdy and cool to the touch. It also can be customized with logos and graphics.
