

Ball Aerospace Selected for Space RCO Tactical Ground Command, Control and Communications Contract

BOULDER, Colo., Aug. 26, 2020 /PRNewswire/ -- Ball Aerospace, teamed with Booz Allen Hamilton, was awarded a contract by the Space Rapid Capabilities Office (SpRCO) to serve as the prime system integrator for the SpRCO Ground Command, Control and Communications (GC3) system. GC3 will integrate into and help enable the larger tactical command and control enterprise for the United States Space Force.

"The GC3 System Integrator program provides a great foundation to work with SpRCO and other space resiliency mission partners to develop and deliver advanced capabilities to support the warfighter," said Mark Healy, vice president and general manager, National Defense, Ball Aerospace. "This mission aligns directly with the 2020 Defense Space Strategy to enable the Department of Defense (DoD) to defend the space domain."

The program will develop and deliver updated and enhanced satellite operations capabilities that enable continuous modernization by maximizing automation, flexibility and commonality. Key to the system's flexibility will be the utilization of Hexicon, a modular, open and scalable event driven software architecture that allows for rapid and seamless integration of new software and overall increased system resiliency.

"We look forward to working closely with SpRCO in developing a multi-mission ground system," said Steve Smith, vice president and general manager, Systems Engineering Solutions, Ball Aerospace. "We are extremely excited to unleash the full potential of Hexicon, our ground-breaking event driven architecture developed for other advanced national defense programs and apply it to meet the Space Force's global operations."

Ball draws upon two decades of ground systems integration and support, including command and control operations, for critical civil and national defense programs, such as NASA's Kepler mission to discover exoplanets and U.S. Air Force's Space-Based Space Surveillance program to detect and track space objects and spacecraft. With Hexicon at its heart, SpRCO's GC3 system will represent the next step forward in scalable and future-proof operations.

"We look forward to supporting Ball Aerospace and the SpRCO and continuing to advance and defend our nation's space superiority," said [Michael Johnston](#), vice president, Booz Allen. "Booz Allen's deep expertise shaping open-source solutions and securely integrating cloud services for ground systems engineering will help support this critical mission and keep cybersecurity at the forefront in the development and implementation of GC3."

Powered by endlessly curious people with an unwavering mission focus, **Ball Aerospace** pioneers discoveries that enable our customers to perform beyond expectation and protect what matters most. We create innovative space solutions, enable more accurate weather forecasts, drive insightful observations of our planet, deliver actionable data and intelligence, and ensure those who defend our freedom go forward bravely and return home safely. Forward-Looking Statements

This release contains "forward-looking" statements concerning future events and financial performance. Words such as "expects," "anticipates," "estimates," "believes," "targets," "likely," "positions" and similar expressions typically identify forward-looking statements, which are generally any statements other than statements of historical fact. Such statements are based on current expectations or views of the future and are subject to risks and uncertainties, which could cause actual results or events to differ materially from those expressed or implied. You should therefore not place undue reliance upon any forward-looking statements and any such statements should be read in conjunction with, and, qualified in their entirety by, the cautionary statements referenced below. The company undertakes no obligation to publicly update or revise any forward-looking

statements, whether as a result of new information, future events or otherwise. Key factors, risks and uncertainties that could cause actual outcomes and results to be different are summarized in filings with the Securities and Exchange Commission, including Exhibit 99 in our Form 10-K, which are available on our website and at www.sec.gov. Additional factors that might affect: a) our packaging segments include product capacity, supply, and demand constraints and fluctuations, including due to virus and disease outbreaks and responses thereto; availability/cost of raw materials and logistics; competitive packaging, pricing and substitution; changes in climate and weather; footprint adjustments and other manufacturing changes, including the startup of new facilities and lines; failure to achieve synergies, productivity improvements or cost reductions; mandatory deposit or other restrictive packaging laws; customer and supplier consolidation; power and supply chain interruptions; potential delays and tariffs related to the U.K.'s departure from the EU; changes in major customer or supplier contracts or a loss of a major customer or supplier; political instability and sanctions; currency controls; changes in foreign exchange or tax rates; and tariffs, trade actions, or other governmental actions, including business restrictions and shelter-in-place orders in any country or jurisdiction affecting goods produced by us or in our supply chain, including imported raw materials, such as those related to COVID-19 and those pursuant to Section 232 of the U.S. Trade Expansion Act of 1962 or Section 301 of Trade Act of 1974; b) our aerospace segment include funding, authorization, availability and returns of government and commercial contracts; and delays, extensions and technical uncertainties affecting segment contracts; c) the company as a whole include those listed plus: the extent to which sustainability-related opportunities arise and can be capitalized upon; changes in senior management, succession, and the ability to attract and retain skilled labor; regulatory action or issues including tax, environmental, health and workplace safety, including U.S. FDA and other actions or public concerns affecting products filled in our containers, or chemicals or substances used in raw materials or in the manufacturing process; technological developments and innovations; the ability to manage cyber threats and the success of information technology initiatives; litigation; strikes; disease; pandemic; labor cost changes; rates of return on assets of the company's defined benefit retirement plans; pension changes; uncertainties surrounding geopolitical events and governmental policies both in the U.S. and in other countries, including policies, orders and actions related to COVID-19, the U.S. government elections, stimulus package(s), budget, sequestration and debt limit; reduced cash flow; interest rates affecting our debt; and successful or unsuccessful joint ventures, acquisitions and divestitures, and their effects on our operating results and business generally.
