

Ball Corporation to Become Proud Sustainability Partner of the Los Angeles Chargers

The partnership will focus on advancing sustainability through community engagement, increased use of aluminum beverage packaging, and activations to improve recycling processes and education

WESTMINSTER, Colo. and LOS ANGELES, April 22, 2021 /PRNewswire/ -- [Ball Corporation](#) (NYSE: BLL) today announced that it will become a Proud Sustainability Partner of the Los Angeles Chargers. The partnership will include community engagement, increased use of aluminum beverage packaging, and game day activations to improve recycling processes and education.

The partnership, which features both organizations' commitment to advancing sustainability in sports and entertainment, builds on Ball's position as the official Infinitely Recyclable Aluminum Packaging Partner of SoFi Stadium. SoFi Stadium will feature the company's infinitely recyclable [Ball Aluminum Cup™](#) for draft beer and cocktails. The Chargers will use the cups at team training facilities, camps and on game days. Additionally, the partnership will allow the organizations to create local sustainability awareness events, targeted community recycling improvements and educational programming.

"We are excited to partner with the Los Angeles Chargers around our shared commitment to advancing sustainability in sports and entertainment," said **Ball Corporation Chairman and CEO John Hayes**. "This partnership is an opportunity to implement real-world solutions to the packaging waste crisis by increasing use of infinitely recyclable aluminum cans, cups and bottles and making recycling easy for teams and fans. We look forward to working with the Los Angeles Chargers to make an impact at SoFi Stadium and within the broader Los Angeles community."

"The Chargers have a long history of both advocating for and implementing recycling programs that not only address the nation's long standing packaging waste crisis, but also aim to modify behavior in an effort to help preserve our planet for future generations," said **Los Angeles Chargers President of Business Operation A.G. Spanos**. "We couldn't be more pleased to partner with Ball Corporation, an industry leader and innovator with a shared vision as it pertains to sustainability, to create local awareness, encourage even greater recycling in the community and provide the newest innovations in aluminum packaging to our fans at all Chargers events."

Ball, a leader in cutting-edge aluminum beverage packaging, as well as climate monitoring and weather forecasting technologies through the Ball Aerospace business, has made [sustainability](#) foundational to its business, operations and products. This partnership builds on Ball's success in developing and piloting the lightweight [Ball Aluminum Cup™](#) in sports and entertainment venues. The cup, a direct response to growing consumer preference for more sustainable products, debuted in 2019 at the former Pepsi Center, now Ball Arena. It is also available at the University of Colorado Boulder's Folsom Field, Allegiant Stadium in Las Vegas, select restaurant properties and retailers, and for purchase on [Amazon](#).

Throughout the life of the partnership, Ball and the Los Angeles Chargers will develop and implement fan-facing activities in and around SoFi Stadium and focus on educational and recycling infrastructure programs for the surrounding local community to celebrate and encourage aluminum recycling – an everyday sustainable choice for consumers and a cornerstone of making a circular economy a reality.

About Los Angeles Chargers

Now in their 63rd season, the Chargers continue to stretch the imagination and put on the most exciting show in football. Behind the dramatic games, unforgettable highlights, beloved players, groundbreaking performances, idyllic Southern California setting and best uniforms in the NFL lies an uncompromising drive for success – one rooted in toughness, resilience and good old-fashioned hard work. A charter member of the American Football League, the franchise was established in Los Angeles in 1960 and called the Los Angeles Memorial Coliseum home during its first year of existence. From 1961 to 2016, the team played in San Diego and advanced to five of the first six AFL Championship games ever played. The Chargers claimed the 1963 AFL title and later joined the National Football League when the two leagues merged in 1970. Since the merger, the Chargers have gone on to appear in Super Bowl XXIX and have captured an additional 10 division titles. The Chargers were purchased by construction leader, philanthropist and real estate developer Alex G. Spanos in 1984 and have

been under the guidance of Spanos' eldest son Dean, the team's current Chairman of the Board, since 1994. Dean Spanos' sons – A.G. Spanos, President of Business Operations, and John Spanos, President of Football Operations – oversee the day-to-day operations of the franchise. The Chargers returned to Los Angeles in 2017, began playing games in their new multi-billion-dollar SoFi Stadium home in 2020 and continue to redefine what an NFL franchise looks like in the 21st century. Forward-Looking Statements

This release contains "forward-looking" statements concerning future events and financial performance. Words such as "expects," "anticipates," "estimates," "believes," and similar expressions typically identify forward-looking statements, which are generally any statements other than statements of historical fact. Such statements are based on current expectations or views of the future and are subject to risks and uncertainties, which could cause actual results or events to differ materially from those expressed or implied. You should therefore not place undue reliance upon any forward-looking statements and any such statements should be read in conjunction with, and qualified in their entirety by, the cautionary statements referenced below. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Key factors, risks and uncertainties that could cause actual outcomes and results to be different are summarized in filings with the Securities and Exchange Commission, including Exhibit 99 in our Form 10-K, which are available on our website and at www.sec.gov. Additional factors that might affect: a) our packaging segments include product capacity, supply, and demand constraints and fluctuations and changes in consumption patterns; availability/cost of raw materials, equipment, and logistics; competitive packaging, pricing and substitution; changes in climate and weather; footprint adjustments and other manufacturing changes, including the startup of new facilities and lines; failure to achieve synergies, productivity improvements or cost reductions; unfavorable mandatory deposit or packaging laws; customer and supplier consolidation; power and supply chain interruptions; changes in major customer or supplier contracts or loss of a major customer or supplier; political instability and sanctions; currency controls; changes in foreign exchange or tax rates; and tariffs, trade actions, or other governmental actions, including business restrictions and shelter-in-place orders in any country or jurisdiction affecting goods produced by us or in our supply chain, including imported raw materials; b) our aerospace segment include funding, authorization, availability and returns of government and commercial contracts; and delays, extensions and technical uncertainties affecting segment contracts; c) the Company as a whole include those listed above plus: the extent to which sustainability-related opportunities arise and can be capitalized upon; changes in senior management, succession, and the ability to attract and retain skilled labor; regulatory action or issues including tax, environmental, health and workplace safety, including U.S. FDA and other actions or public concerns affecting products filled in our containers, or chemicals or substances used in raw materials or in the manufacturing process; technological developments and innovations; the ability to manage cyber threats; litigation; strikes; disease; pandemic; labor cost changes; rates of return on assets of the Company's defined benefit retirement plans; pension changes; uncertainties surrounding geopolitical events and governmental policies both in the U.S. and in other countries, including policies, orders, and actions related to COVID-19; reduced cash flow; interest rates affecting our debt; and successful or unsuccessful joint ventures, acquisitions and divestitures, and their effects on our operating results and business generally.
