

## **Ball Aerospace Names Dr. Jake Sauer Vice President and General Manager of Tactical Solutions Business**

BOULDER, Colo., Sept. 25, 2019 – Earlier today, Ball Aerospace announced that Dr. Rob Freedman, vice president and general manager of the company's Tactical Solutions (TS) business, plans to retire at the end of the year. Dr. Jake Sauer, currently senior director, Survivability and Strike (SAS) business area, will succeed Freedman. Freedman and Sauer will work together through the remainder of the year to ensure a smooth transition.

"Throughout his career, Rob has made a significant impact on the success of TS, and we are both grateful for his leadership at Ball and his service to our nation," said Rob Strain, president, Ball Aerospace. "Jake is a results-oriented, collaborative and energetic leader with high integrity and humility. His vision and deep understanding of our customers' missions make him an ideal leader to advance Ball's growth objectives in our TS business."

Since joining Ball in 1998, Freedman has held numerous leadership positions within TS prior to taking the helm of the business unit in 2013. Over the past seven years, he has played an instrumental role in establishing the company as an industry leader in advanced tactical systems for the warfighter. Moreover, Freedman is dedicated to building the next generation of aerospace leaders, advocating and mentoring rising talent and volunteering his time to support STEM outreach. Prior to joining Ball, Freedman served 28 years in the military as a naval aviator.

Upon joining Ball in 2012, Sauer established and grew the company's mission analysis capabilities, helping the nation to place critical hardware into the field quickly and efficiently. As senior director of SAS, Sauer's vision and business model for the mission area has put TS on the leading edge of technology development and helped solidify Ball as a true mission partner for the warfighter. Sauer joined Ball from MIT's Lincoln Laboratory, where he worked for the U.S. Air Force Red Team on air vehicle survivability. He earned undergraduate degrees in physics and mathematics from the University of Cologne in Germany, a master's degree in physics and Ph.D. in quantum computing and control from the Georgia Institute of Technology.

Powered by endlessly curious people with an unwavering mission focus, **Ball Aerospace** pioneers discoveries that enable our customers to perform beyond expectation and protect what matters most. We create innovative space solutions, enable more accurate weather forecasts, drive insightful observations of our planet, deliver actionable data and intelligence, and ensure those who defend our freedom go forward bravely and return home safely. ### **Forward-Looking Statements**

This release contains "forward-looking" statements concerning future events and financial performance. Words such as "expects," "anticipates," "estimates," "believes," "targets," "likely," "positions" and similar expressions typically identify forward-looking statements, which are generally any statements other than statements of historical fact. Such statements are based on current expectations or views of the future and are subject to risks and uncertainties, which could cause actual results or events to differ materially from those expressed or implied. You should therefore not place undue reliance upon any forward-looking statements and any such statements should be read in conjunction with, and, qualified in their entirety by, the cautionary statements referenced below. The company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Key factors, risks and uncertainties that could cause actual outcomes and results to be different are summarized in filings with the Securities and Exchange Commission, including Exhibit 99 in our Form 10-K, which are available on our website and at [www.sec.gov](http://www.sec.gov). Additional factors that might affect: a) our packaging segments include product demand fluctuations; availability/cost of raw materials and logistics; competitive packaging, pricing and substitution; changes in climate and weather; footprint adjustments and other manufacturing changes; failure to achieve synergies, productivity improvements or cost reductions; mandatory deposit or other restrictive packaging laws; customer and supplier consolidation, power and supply chain influence; changes in major customer or supplier contracts or a loss of a major customer or supplier; political instability and sanctions; currency controls; changes in foreign exchange or tax rates; and tariffs, trade actions, or other governmental actions in any country affecting goods produced by us or in our supply chain, including imported raw materials, such as pursuant to section 232 of the U.S. Trade Expansion Act of 1962; b) our aerospace segment include funding, authorization,

availability and returns of government and commercial contracts; and delays, extensions and technical uncertainties affecting segment contracts; c) the company as a whole include those listed plus: changes in senior management; regulatory action or issues including tax, environmental, health and workplace safety, including U.S. FDA and other actions or public concerns affecting products filled in our containers, or chemicals or substances used in raw materials or in the manufacturing process; technological developments and innovations; litigation; strikes; labor cost changes; rates of return on assets of the company's defined benefit retirement plans; pension changes; uncertainties surrounding geopolitical events and governmental policies both in the U.S. and in other countries, including the U.S. government elections, budget, sequestration and debt limit; reduced cash flow; interest rates affecting our debt; and successful or unsuccessful joint ventures, acquisitions and divestitures, including with respect to the Rexam PLC acquisition and its integration, or the associated divestiture; the effect of the acquisition or the divestiture on our business relationships, operating results and business generally.
