

Commitment to Customer Partnerships and Innovation on Display at 33rd Annual Space Symposium

BOULDER, Colo., March 31, 2016 – For more than 60 years, Ball Aerospace has supported critical missions for national agencies such as the Department of Defense, NASA, NOAA and other U.S. government and commercial entities. Ball will highlight its pioneering discoveries and innovation at the 33rd annual Space Symposium, the nation's premier space forum, in Colorado Springs, Colo., on April 3-6.

"Ball Aerospace is well known in the space industry for our first-class instruments, robust spacecraft, innovative data exploitation solutions and advanced technologies for civil, defense and commercial applications," said Debra Facktor Lepore, Ball Aerospace's vice president and general manager, strategic operations and commercial aerospace business unit. "From building instruments and spacecraft to integrating remote sensing and data analytics capabilities on commercial platforms, we pioneer discoveries that enable our customers to perform beyond expectation and protect what matters most."

At this year's Symposium, Ball Aerospace leaders will participate in the following:

- Monday, April 3: Space, Cyber and IT: The Need for a Comprehensive Response [Classified]: Steve Smith, VP and General Manager, Systems Engineering Solutions
- Monday, April 3: Space Generation Fusion Forum Career's Panel – Debra Facktor Lepore, VP and General Manager, Strategic Operations and Commercial Aerospace Business Unit
- Tuesday, April 4: Space Warfighters Luncheon – hosted by Ball Aerospace

Ball Aerospace will also participate in six Tech Track talks on Monday, April 3:

- Space Situational Awareness (SSA), Colorado Hall C, 9:45 am
 - o "An Innovative, High Fidelity Approach to Space Situational Awareness (SSA) Data Simulation"
- Big Ideas and Architectures, Colorado Hall F, 10:05 am
 - o "Open Sourcing the Ball Aerospace COSMOS Command and Control System"
- Earth Weather and Forecasting, Colorado Hall F, 11:05 am and 11:45 pm
 - o "Emerging Earth Remote Sensing Instrument for Tropospheric Emissions Monitoring of Pollution (TEMPO)"
 - o "Satellite-based Global Wind Profiling to Improve Numerical Weather Prediction"
- Space Technology Innovation, Colorado Hall C, 2:25 pm and 3:05 pm
 - o "Advanced On-Board Calibration of Space Systems Using a Carbon Nanotube Flat-Plate Blackbody"
 - o "Frequency Comb Development for Ultra-precise Space Based Applications"

Additional information on Ball's programs and capabilities is available on the [Digital Media Kit](#) or on display in Booth #523.

Ball Aerospace pioneers discoveries that enable our customers to perform beyond expectation and protect what matters most. We create innovative space solutions, enable more accurate weather forecasts, drive insightful observations of our planet, deliver actionable data and intelligence, and ensure those who defend our freedom go forward bravely and return home safely. For more information, visit www.ball.com/aerospace or connect with us on [Facebook](#) or [Twitter](#).

Ball Corporation supplies innovative, sustainable packaging solutions for beverage, food and household products customers, as well as aerospace and other technologies and services primarily for the U.S. government. Ball Corporation and its subsidiaries employ 18,450 people worldwide and 2016 net sales were \$9.1 billion. For more information, visit www.ball.com, or connect with us on [Facebook](#) or [Twitter](#).

Forward-Looking Statements

This release contains "forward-looking" statements concerning future events and financial performance. Words such as "expects," "anticipates," "estimates," "believes," "targets," "likely" and similar expressions typically identify forward-looking statements, which are generally any statements other than statements of historical fact. Such statements are based on current expectations or views of the future and are subject to risks and uncertainties, which could cause actual results or events to differ materially from those expressed or implied. You should therefore not place undue reliance upon any forward-looking statements and any of such statements should be read in conjunction with, and, qualified in their entirety by, the cautionary statements referenced below. The company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Key factors, risks and uncertainties that could cause actual outcomes and results to be different are summarized in filings with the Securities and Exchange Commission, including Exhibit 99 in our Form 10-K, which are available on our website and at www.sec.gov. Additional factors that might affect: a) our packaging segments include product demand

fluctuations; availability/cost of raw materials; competitive packaging, pricing and substitution; changes in climate and weather; competitive activity; failure to achieve synergies, productivity improvements or cost reductions; mandatory deposit or other restrictive packaging laws; customer and supplier consolidation, power and supply chain influence; changes in major customer or supplier contracts or a loss of a major customer or supplier; political instability and sanctions; currency controls; and changes in foreign exchange or tax rates; b) our aerospace segment include funding, authorization, availability and returns of government and commercial contracts; and delays, extensions and technical uncertainties affecting segment contracts; c) the company as a whole include those listed plus: changes in senior management; regulatory action or issues including tax, environmental, health and workplace safety, including U.S. FDA and other actions or public concerns affecting products filled in our containers, or chemicals or substances used in raw materials or in the manufacturing process; technological developments and innovations; litigation; strikes; labor cost changes; rates of return on assets of the company's defined benefit retirement plans; pension changes; uncertainties surrounding geopolitical events and governmental policies both in the U.S. and in other countries, including the U.S. government elections, budget, sequestration and debt limit; reduced cash flow; ability to achieve cost-out initiatives and synergies; interest rates affecting our debt; and successful or unsuccessful acquisitions and divestitures, including with respect to the Rexam PLC acquisition and its integration, or the associated divestiture; the effect of the acquisition or the divestiture on our business relationships, operating results and business generally.
