

Ball Aerospace-Built WorldView-2 Satellite Arrives at Vandenberg Air Force Base

PRNewswire-FirstCall
BOULDER, Colo.

Ball Aerospace & Technologies Corp. announced today that its WorldView-2 remote sensing satellite built for DigitalGlobe has arrived at Vandenberg Air Force Base for a scheduled October 6, 2009 launch aboard a United Launch Alliance Delta 2 rocket into a Sun-synchronous orbit.

Ball Aerospace announced that it had completed environmental testing for WorldView-2 on August 5. The satellite was then shipped to Lompoc, California to begin on-site testing prior to launch. Over the next several weeks, engineers will integrate the satellite with the launch vehicle and perform extensive tests to ensure the satellite and rocket can launch successfully.

The Ball Aerospace BCP 5000 spacecraft, utilized for both the WorldView-1 and Worldview-2, is designed to handle both next-generation optical and synthetic aperture radar remote sensing payloads and is currently meeting or exceeding all performance specifications on the operational WorldView-1 satellite. The high-performance BCP 5000 has a design life of more than seven years, and provides a platform with increased power, agility, flexibility, transmission capability and data storage. The spacecraft's control-moment gyroscopes will afford the flexibility to capture more imagery than ever before.

DigitalGlobe is a leading provider of commercial high-resolution, world imagery products and services.

Ball Aerospace & Technologies Corp. supports critical missions of important national agencies such as the Department of Defense, NASA, NOAA and other U.S. government and commercial entities. The company develops and manufactures spacecraft, advanced instruments and sensors, components, data exploitation systems and RF solutions for strategic, tactical and scientific applications.

Ball Corporation is a supplier of high-quality metal and plastic packaging for beverage, food and household products customers, and of aerospace and other technologies and services, primarily for the U.S. government. Ball Corporation and its subsidiaries employ more than 14,000 people worldwide and reported 2008 sales of approximately \$7.6 billion.

Forward-Looking Statements

This release contains "forward-looking" statements concerning future events and financial performance. Words such as "expects," "anticipates," "estimates" and similar expressions are intended to identify forward-looking statements. Such statements are subject to risks and uncertainties which could cause actual results to differ materially from those expressed or implied. The company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Key risks and uncertainties are summarized in filings with the Securities and Exchange Commission, including Exhibit 99.2 in our Form 10-K, which are available at our Web site and at www.sec.gov. Factors that might affect our packaging segments include fluctuation in product demand and preferences; availability and cost of raw materials; competitive packaging availability, pricing and substitution; changes in climate and weather; crop yields; competitive activity; failure to achieve anticipated productivity improvements or production cost reductions, including our beverage can end project; mandatory deposit or other restrictive packaging laws; changes in major customer or supplier contracts or loss of a major customer or supplier; and changes in foreign exchange rates, tax rates and activities of foreign subsidiaries. Factors that might affect our aerospace segment include: funding, authorization, availability and returns of government and commercial contracts; and delays, extensions and technical uncertainties affecting segment contracts. Factors that might affect the company as a whole include those listed plus: accounting changes; changes in senior management; the current global credit squeeze and its effects on liquidity, credit risk, asset values and the economy; successful or unsuccessful acquisitions, joint ventures or divestitures; integration of recently acquired businesses; regulatory action or laws including tax, environmental, health and workplace safety, including in respect of chemicals or substances used in raw materials or in the manufacturing process; governmental investigations; technological developments and innovations; goodwill impairment; antitrust, patent and other litigation; strikes; labor cost changes; rates of return projected and earned on assets of the company's defined benefit retirement plans; pension changes; reduced cash flow; interest rates affecting our debt; and changes to unaudited results due to statutory audits or other effects.
