

## **Ball Aerospace Awarded Spacecraft Operation Support Suomi NPP Satellite Providing Life-Saving Weather Data**

BOULDER, Colo., Feb. 13, 2017 /PRNewswire/ -- NASA has awarded a contract to Ball Aerospace for continued spacecraft operations support for the NOAA/NASA Suomi National Polar-orbiting Partnership (Suomi NPP) satellite. The sole source contract has a maximum ordering period of five years beginning March 7, 2017.

Ball's engineers designed and built the Suomi NPP satellite vehicle and its Ozone Mapping and Profiler Suite (OMPS) instrument, integrated all five of the satellite instruments, and performed satellite-level testing and launch support. Since its launch in 2011, Suomi NPP has provided life-saving data to weather forecasters and has given scientists new tools to help monitor the health of our planet.

"We are in a unique position to assist with essential sustaining engineering services and proud to have the opportunity to continue our role of providing critical spacecraft operations support to help Suomi NPP go beyond its original charter," said Jim Oschmann, Ball Aerospace vice president and general manager, civil space business unit. "The Suomi NPP satellite has significantly impacted everyday safety around the world - largely invisible to the general public and indispensable to the scientific communities at NASA, NOAA and the Department of Defense."

Suomi NPP has performed to the highest expectations of our nation's weather program for NOAA, and has met the stringent scientific requirements for NASA's long-term earth observation datasets used in studying climate trends. The spacecraft met all expectations and is the primary polar-orbiting spacecraft for NOAA's operational weather forecasting mission. Over the course of 14 daily trips around the Earth, Suomi NPP observes our planet's entire surface twice each day - mapping both the daytime side and the nighttime side - flying in a polar orbit at 512 miles (824 kilometers) high, and logging more than 27,000 orbits since its launch. Its observations help meteorologists improve the accuracy and extend the range of global forecasts three to seven days in advance of significant weather events, including hurricanes and winter storms.

Suomi NPP's five instrument systems monitor moisture and pressure, collect infrared and visible light, detect thermal radiation, create global moisture and temperature models and gather ultraviolet data to measure ozone levels via the Ball-built OMPS. Whether on land, on water or in the sky, Suomi NPP's weather-tracking platform has the technology to enhance safety in a variety of near- and longer-term applications.

Suomi-NPP is part of NOAA's next-generation Joint Polar Satellite System (JPSS) constellation of polar-orbiting environmental satellites. Ball is also building the next-generation weather spacecraft, JPSS-1, expected to launch in 2017. Ball's OMPS instrument will also fly on JPSS-1 and all JPSS follow-on spacecraft. More information on Ball Aerospace and Suomi NPP can be found here: <http://www.ball.com/aerospace/programs/suomi-npp>.

**Ball Aerospace** pioneers discoveries that enable our customers to perform beyond expectation and protect what matters most. We create innovative space solutions, enable more accurate weather forecasts, drive insightful observations of our planet, deliver actionable data and intelligence, and ensure those who defend our freedom go forward bravely and return home safely. For more information, visit [www.ball.com/aerospace](http://www.ball.com/aerospace) or connect with us on [Facebook](#) or [Twitter](#).

**Ball Corporation** supplies innovative, sustainable packaging solutions for beverage, food and household products customers, as well as aerospace and other technologies and services primarily for the U.S. government. Ball Corporation and its subsidiaries employ 18,450 people worldwide and 2016 net sales were \$9.1 billion. For more information, visit [www.ball.com](http://www.ball.com), or connect with us on [Facebook](#) or [Twitter](#).

### **Forward-Looking Statements**

This release contains "forward-looking" statements concerning future events and financial performance. Words such as "expects," "anticipates," "estimates," "believes," "targets," "likely" and similar expressions typically identify forward-looking statements, which are generally any statements other than statements of historical fact. Such statements are based on current expectations or views of the future and are subject to risks and uncertainties, which could cause actual results or events to differ materially from those expressed or implied. You should therefore not place undue reliance upon any forward-looking statements and any of such statements should be read in conjunction with, and, qualified in their entirety by, the cautionary statements referenced below. The company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Key factors, risks and uncertainties that

could cause actual outcomes and results to be different are summarized in filings with the Securities and Exchange Commission, including Exhibit 99 in our Form 10-K, which are available on our website and at [www.sec.gov](http://www.sec.gov). Additional factors that might affect: a) our packaging segments include product demand fluctuations; availability/cost of raw materials; competitive packaging, pricing and substitution; changes in climate and weather; competitive activity; failure to achieve synergies, productivity improvements or cost reductions; mandatory deposit or other restrictive packaging laws; customer and supplier consolidation, power and supply chain influence; changes in major customer or supplier contracts or a loss of a major customer or supplier; political instability and sanctions; currency controls; and changes in foreign exchange or tax rates; b) our aerospace segment include funding, authorization, availability and returns of government and commercial contracts; and delays, extensions and technical uncertainties affecting segment contracts; c) the company as a whole include those listed plus: changes in senior management; regulatory action or issues including tax, environmental, health and workplace safety, including U.S. FDA and other actions or public concerns affecting products filled in our containers, or chemicals or substances used in raw materials or in the manufacturing process; technological developments and innovations; litigation; strikes; labor cost changes; rates of return on assets of the company's defined benefit retirement plans; pension changes; uncertainties surrounding geopolitical events and governmental policies both in the U.S. and in other countries, including the U.S. government elections, budget, sequestration and debt limit; reduced cash flow; ability to achieve cost-out initiatives and synergies; interest rates affecting our debt; and successful or unsuccessful acquisitions and divestitures, including with respect to the Rexam PLC acquisition and its integration, or the associated divestiture; the effect of the acquisition or the divestiture on our business relationships, operating results and business generally.
