

## **Commitment to Innovation and Technology on Display at GEOINT Symposium**

BOULDER, Colo., June 2, 2017 – For more than 60 years, Ball Aerospace has supported critical missions for the Department of Defense, National Geospatial-Intelligence Agency (NGA), NASA and other U.S. government and commercial entities. Ball demonstrates its innovative solutions that translate data into actionable intelligence at the GEOINT Symposium, in San Antonio, Texas, from June 5-7.

"Ball Aerospace is known in the industry for our commitment to advancing our nation's intelligence capabilities through data exploitation," said Steve Smith, vice president and general manager, Systems Engineering Solutions. "We are leveraging our heritage of solutions with emerging technologies to draw deeper understanding from the data collected every minute of every day, ultimately protecting what matters most, our warfighters."

Visit Ball Aerospace at this year's GEOINT Symposium, Booth #1933

**ScanEagle TotalSight 3D LIDAR:** Ball's real-time, full-motion Flash 3D LIDAR imaging systems provide warfighters and first responders with critical geolocation information that can be easily manipulated and shared while on the move. Ball can tailor the system to a wide range of mission objectives for a variety of operational platforms.

**VizZen:** Ball launches its new, powerful cloud-based software solution that maximizes customers' current investments and manages data like never before. VizZen allows organizations to gather, understand and take action through the power of data visualization. Across any application, VizZen enables users to quickly and securely see more and do more with their data.

**Scale:** Scale provides the framework for algorithm development and cloud transition. Developed for the NGA, Scale can validate new data against historic resources while integrating, managing and monitoring algorithms, data and compute resources.

**Data Collection and Analysis with Spire Global:** Ball is collaborating on a data collection and analysis platform in the Arctic on behalf of the NGA to improve Maritime Domain Awareness (MDA).

Ball Aerospace pioneers discoveries that enable our customers to perform beyond expectation and protect what matters most. We create innovative space solutions, enable more accurate weather forecasts, drive insightful observations of our planet, deliver actionable data and intelligence, and ensure those who defend our freedom go forward bravely and return home safely. ## Forward-Looking Statements

This release contains "forward-looking" statements concerning future events and financial performance. Words such as "expects," "anticipates," "estimates," "believes," "targets," "likely" and similar expressions typically identify forward-looking statements, which are generally any statements other than statements of historical fact. Such statements are based on current expectations or views of the future and are subject to risks and uncertainties, which could cause actual results or events to differ materially from those expressed or implied. You should therefore not place undue reliance upon any forward-looking statements and any of such statements should be read in conjunction with, and, qualified in their entirety by, the cautionary statements referenced below. The company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Key factors, risks and uncertainties that could cause actual outcomes and results to be different are summarized in filings with the Securities and Exchange Commission, including Exhibit 99 in our Form 10-K, which are available on our website and at [www.sec.gov](http://www.sec.gov). Additional factors that might affect: a) our packaging segments include product demand fluctuations; availability/cost of raw materials; competitive packaging, pricing and substitution; changes in climate and weather; competitive activity; failure to achieve synergies, productivity improvements or cost reductions; mandatory deposit or other restrictive packaging laws; customer and supplier consolidation, power and supply chain influence; changes in major customer or supplier contracts or a loss of a major customer or supplier; political instability and sanctions; currency controls; and changes in foreign exchange or tax rates; b) our aerospace segment include funding, authorization, availability and returns of government and commercial contracts; and delays, extensions and technical uncertainties affecting segment contracts; c) the company as a whole include those listed plus: changes in senior management; regulatory action or issues including tax, environmental, health and workplace safety, including U.S. FDA and other actions or public concerns affecting products filled in our containers, or chemicals or substances used in raw materials or in the manufacturing process; technological developments and innovations; litigation; strikes; labor cost changes; rates of return on assets of the company's defined benefit retirement plans; pension changes; uncertainties surrounding geopolitical events and governmental policies both in the U.S. and in other countries, including the U.S. government elections, budget, sequestration and debt limit; reduced cash flow; ability to achieve cost-out initiatives and synergies; interest rates affecting our debt; and successful or unsuccessful acquisitions and divestitures, including with respect to the Rexam PLC acquisition and its integration, or the associated divestiture; the effect of the acquisition or the divestiture on our business relationships, operating results and business generally.
